

Amendment to the Claims:

Cancel claims 5-7 and 12-14 and amend claims 1, 8, and 15. As such this listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (currently amended) A heat shrinkable film laminate useful for packaging comprising in order:

- (a) a heat shrinkable film comprising a polymer having at least 80% by weight polyethylene terephthalate polymer, wherein said film is biaxially oriented in the range of about 5% to about 55%, said film having an outer surface and an inner surface; and
- (b) a solventless adhesive coating comprising diphenylene isocyanate; and
- (c) a film having no heat shrinkage or a heat shrinkage of at least 5% less than said heat shrinkable film (a).

Claim 2 (previously amended) The laminate of claim 1 wherein the film of (c) having a heat shrinkage of at least 10% less than said heat shrinkable film (a).

Claim 3 (original) The laminate of claim 1 wherein the film of (c) having substantially no heat shrinkage.

Claim 4 (original) The laminate of claim 1 wherein the film of (c) is selected from the group consisting of nylon, polypropylene, polyethylene, ionomer, acid copolymer, ethylene vinyl acetate, polyethylene terephthalate, polystyrene, ethylene vinyl alcohol, polyvinylidene chloride, and coextruded combinations thereof.

Claim 5-7 (cancelled)

Claim 8 (currently amended) A heat shrinkable film laminate useful for packaging comprising in order:

- (a) a heat shrinkable film comprising a polymer having at least 80% by weight polyethylene terephthalate polymer, wherein said film

is biaxially oriented in the range of about 5% to about 55%, said film having an outer surface and an inner surface; and

- (b) a solventless adhesive coating comprising diphenylene isocyanate; and
- (c) a film having a heat shrinkage of at least 5% less than said heat shrinkable film (a), and
- (d) further comprising a barrier layer adjacent the heat shrinkable film (a).

Claim 9 (previously amended) The laminate of claim 8 wherein the film of (c) having a heat shrinkage of at least 10% less than said heat shrinkable film (a).

Claim 10. (original) The laminate of claim 8 wherein the film of (c) having substantially no heat shrinkage.

Claim 11 (original) The laminate of claim 8 wherein the film of (c) is selected from the group consisting of nylon, polypropylene, polyethylene, ionomer, acid copolymer, ethylene vinyl acetate, polyethylene terephthalate, polystyrene, ethylene vinyl alcohol, polyvinylidene chloride, and coextruded combinations thereof.

Claim 12-14 (cancelled)

Claim 15 (currently amended) A package adapted to contain a food comprising a tray in combination with a heat shrinkable film laminate comprising in order:

- (a) a heat shrinkable film comprising a polymer having at least 80% by weight polyethylene terephthalate polymer, wherein said film is biaxially oriented in the range of about 5% to about 55%, said film having an outer surface and an inner surface; and
- (b) a solventless adhesive coating comprising diphenylene isocyanate; and
- (c) a film having a heat shrinkage of at least 5% less than said heat shrinkable film (a), and

- (d) further comprising a barrier layer adjacent the heat shrinkable film (a).
